Credit Life Insurance

Credit Life Insurance is designed to reduce or extinguish an insured's debt in the event of death.

Credit Life premium is calculated by using the state mandated rate which is the same for all ages. The premium is based on the loan amount, loan term, and type of coverage selected - not the borrower's age.

State of Mississippi Credit Life Rates:

<u>Type of Coverage</u>	<u>Rate</u>	
Single Decreasing Term Coverage	\$.80	Per \$100 per year
Single Level Term Coverage	\$1.60	Per \$100 per year
Joint Decreasing Term Coverage	\$1.39	Per \$100 per year
Joint Level Term Coverage	\$2.80	Per \$100 per year

Credit Life can be written to include **Credit Disability Insurance**. Credit disability pays or reduces the monthly loan payment if the Insured Debtor is disabled. Credit disability is not available to the Joint Insured Debtor.

Decreasing Credit Life coverage reduces each month coverage is in force and insures the total of remaining payments at time of death.

Level Credit Life coverage insures the original amount of life insurance shown on the certificate.

Effective Date: If the proposed insured is eligible for insurance according to regular underwriting requirements, the insurance will become effective on the loan date providing the certificate is completed and signed.

Prepayment: If the insured pre-pays the loan, the creditor/insured may terminate the policy and request a refund of unearned premium.

Summary of Amount and Age Limits

Credit Life Limits of Coverage – Level or Decreasing
